

# {Ariana Antonio} | iOS Developer

---

## PROFILE

Enjoys building high quality apps which integrate clean, functional code with awesome design. Loves the lifelong learning, creative challenges, and the logic and puzzles that programming brings. Favorite phrase is, "Hmm. I don't know how to do that. I can't wait to go figure it out."

---

## SKILLS

Swift  
Objective-C  
Xcode  
RESTful APIs  
Git/Github  
Agile/Scrum  
Cocoa Touch  
Core Data  
SQLite  
Interface Builder  
Auto Layout  
MVC & MVVM  
iOS SDK

---

## OPEN SOURCE CONTRIBUTIONS

BlindWays - Perkins School for the Blind  
Rich Relevance

---

## EDUCATION

**Full Sail University**  
B.S.: Mobile Development  
GPA: 3.76  
Awards: Valedictorian  
Course Director Award - Mobile Interfaces and Usability

## EXPERIENCE

### Raizlabs

October 2015 - April 2017

Position: iOS Developer

Worked as a team on multiple iOS apps for popular brands in both Swift and Objective C.

- Responsible for building out new features quickly and efficiently while working as part of a team to build quality apps.
- Participated in code reviews for project pull requests.
- Researched and implemented new technologies and design patterns.
- Started as an intern and promoted to developer within four months.

### MedFax

June 2014 - October 2015

Position: Objective C Developer

Worked as the sole developer on applications used internally for research and data collection.

- Created and modified database driven Mac and iOS apps using Objective-C and SQLite.
  - Successfully streamlined the data entry and research process within the company by building programs that made the user experience easy and intuitive.
- 

## VOLUNTEER WORK

### CODE2040

Mentor 2016

Provided mentorship and support to a CODE2040 Fellow as she navigated a summer internship.

### Black Girls Code

Technical Workshop Assistant

Helped run workshops teaching basic programming concepts to young girls interesting in coding.

---

## SIDE PROJECTS

### Ink After Pink

An app for women who have had a mastectomy due to breast cancer and are undecided what kind of nipple reconstruction they would like. The user can upload a photo of their chest, or use a default image the app supplies, and "try-on" various types of tattoos to aid in their decision. A demo of this app helped lead to winning a scholarship to WWDC17.

### iAspire For Actors

An app that randomly displays an inspirational quote from a famous actor. Designed for actors in need of a quick dose of inspiration. Currently available for iPhone, iPad, and Apple Watch.
